Expand our planet.  
Expand our future.

## HISTORY

ispace is a private lunar exploration company with a vision to extend human presence beyond Earth. The company has offices in Japan (HQ), Europe (Luxembourg) and the United States, and has signed partnerships with the Japan Aerospace Exploration Agency (JAXA) and the Government of Luxembourg. ispace raised nearly \$95 million (USD) in Series A funding—the largest on record in Japan and among the largest in the global space industry. ispace also managed Team HAKUTO, one of the 5 finalists in the Google Lunar XPRIZE competition.

## BUSINESS

To construct a sustainable Earth and Moon ecosystem implementing space resources:

- Marketing Support for Space Content Industries
- Sale and Survey of Moon Surface Data
- High Frequency Lunar Transport
- Payload Development for Lunar Orbiting and Landing
- R&D for Space Resource Development

# PRODUCT

©ispace, inc.

## 1. Payload Delivery

We will deliver payloads to the Moon on our landers and rovers.

©ispace, inc.

## 2. Data Collection

Using our rovers, we will provide valuable scientific data about lunar environment for space and non-space customers.

©ispace, inc.

## 3. Partnerships

We offer opportunities for technology and R&D collaboration, as well as marketing and promotion.
