

WARPSPACE

Lead the frontier era of space
with our CubeSat technology

HISTORY

WARPSPACE Inc. was founded in August 2016 as a space field startup after 5 years satellites development experiences at the University of Tsukuba, Japan.

We have experienced two real satellite developments and launch under the JAXA program.

In addition to our professional knowledge and experiences, we pursue the space development for everyone through our close partnership with JAXA and access to various research institutes located in Tsukuba Science City.

BUSINESS

Communication Infrastructure Business for Low Orbit Satellites

PRODUCT/SERVICE

WarpHub InterSat
Make one step forward to the galaxy with wit and generosity.

Anytime Anywhere
1Gbps Optical Link (Maximum)

WarpHub InterSat 01
Orbit 10,000km altitude

WarpHub InterSat 02
Orbit 1000km altitude

WarpHub InterSat 03

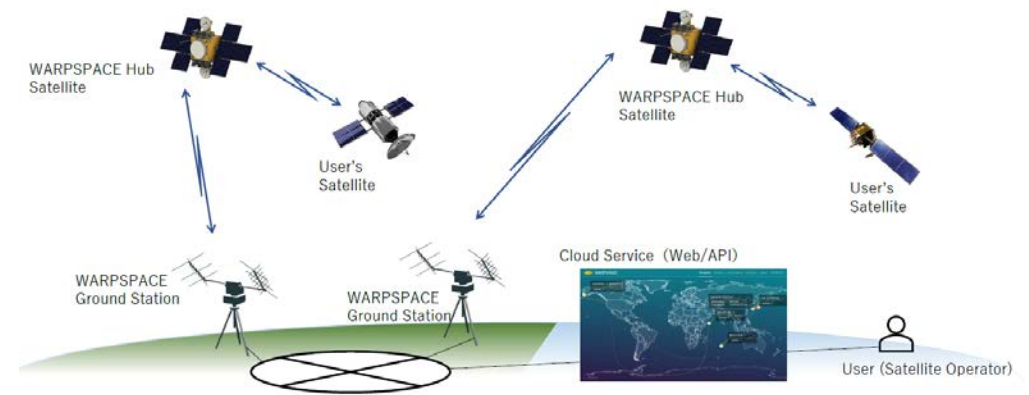

WARPSPACE

Be launched by
2022

The graphic features a central Earth globe with three satellite orbits. WarpHub InterSat 01 is in a 10,000km orbit, while 02 and 03 are in a 1000km orbit. Blue lines represent optical links between the satellites and the ground stations. The WarpSpace logo is in the top right, and the launch year '2022' is at the bottom right.

WarpHub InterSat Service

Anytime Anywhere
Delivering the internet anywhere in space

User satellites can connect the hub satellite and have a fast 24/7 link with equipping only an ultra-compact communication module of optical laser component. WarpHub will realize a full-time connection and overwhelming high cost performance for satellite communication.

HQ Location	2-5-1-203 Azuma, Tsukuba science city, Ibaraki, Japan
Overseas Office	-
Year of Establishment	2016
Main Products	Communication Infrastructure Business for Low Orbit Satellites
Main Client	Satellite operators
